Av.Federico García Lorca, Almería 1994

RELEVANT EXPERIENCE

Full Stack Developer

Artificial Intelligence Talentum

05/2025 - 07/2025

- Spring Boot 3 REST API with a focus on performance, security, modern Java features, and consuming SOAP services with a responsive front-end developed in React JS

Frontend Developer

Snorkel Spain SL

06/2024 - 11/2024

- Development of an AI agent to improve the team's efficiency in content creation by at least 100% (React JS and Laravel, GitHub)
- Used OpenAI, Claude, Midjourney, Stable Diffusion and Vertex AI

Software Developer Consultant

Alten Spain

02/2022 - 06/2023

- Mobile app (migration from Angular to React Native) for a bank
- Dashboard development (Vue, Cypress, Percy, Java Spring Boot, Python) for an energy company
- Agile software development, TDD, pair programming and GitHub
- Continuous integration with Jenkins, Terraform and Docker

Software Engineer

Rithmi

05/2020 - 01/2022

- Mobile app for health monitoring and early disease detection (React Native, TypeScript, iOS, Android)
- Testing (Jest)
- Agile software development

Co-Founder & Front-end developer

Ascendio Systems

06/2018 - 02/2020

- Entrepreneurial experience
- Vue.js for developing single-page applications
- CMS for e-commerce implementation
- HubSpot integration
- Google Cloud Vision API

CONFERENCES

Laracon EU 2019 - Madrid

Awwwards Conference Leaders - Valencia 2024

Awwards Conference Developers - Valencia 2024

PROFILE SUMMARY

AI Engineer with a strong foundation in full-stack web development and 5+ years of experience building production-ready applications. I combine hands-on expertise in React, Vue, Next.js, Java Spring Boot, and modern delivery practices with focused training in LLMs, agentic workflows, RAG, secure AI applications, real-time communication, data pipelines, and AI engineering project delivery. My background bridges product-oriented software engineering and applied AI, allowing me to design and ship intelligent systems that are practical, scalable, and aligned with business goals.

ACHIEVEMENTS

Content Creation Efficiency

Reduced content creation time by 50% through automation with AI tools.

App Migration Success

Engaged in successful app migration, increasing performance by 30%.

Dashboard Development

Developed high-performance dashboard, increasing data processing speed by 20%.

AI Agent Implementation

Enhanced team productivity by 25% with implementation of AI agent.

EDUCATION

Bachelor's Degree in Telecommunications Technology

UNIVERSITAT POLITÈCNICA DE VALENCIA

2012 - 2017

AI Engineering

4Geeks Academy

2026 - Present

- LLMs, agentic workflows, and automation
- RAG, secure AI applications, and AI systems in production
- Models & training, real-time communication, data pipelines, and AI engineering project delivery

SKILLS

JavaScript	TypeScript		React	Vue
Next	unit and e2e testing		Java	
Python	PHP	SQL	MongoDB	Git
CI/CD	LLM	RAG	Agentic Workflows	
Agentic Engineering		Models & Training		
Real-Time Communication				
Secure AI Applications				
AI Engineering Project Delivery				
Data Pipelines		Python	OpenClaw
